Dear Ms. Hanlon

10/19/01

Please find enclosed comments on the DOE's Yucca Mtn. PSSE from concerned citizens across the USA. We look forward to your response.

Sincerely,  
Kevin Lamps  
Nuclear Waste Specialist

## Petition Opposing the DOE's Preliminary Recommendation of a Yucca Mountain Nuclear Waste Dump

Comments on the Dept. of Energy's Preliminary Recommendation of Yucca Mountain Nuclear Waste Repository.

Yucca Mountain is Western Shoshone Indian land, as affirmed by the Treaty of Ruby Valley entered into by the U.S. Government in 1863. The Western Shoshone National Council adamantly opposes dumping nuclear waste at Yucca Mountain.

How can the Secretary of Energy be preparing to recommend Yucca Mountain for a high-level nuclear waste dump when thousands of public comments on the Draft Environmental Impact Statement have not been addressed and key documents have not been finalized? In the absence of a Final Environmental Impact Statement, a Nuclear Regulatory Commission review, and a detailed proposal for transporting nuclear waste to Nevada, the Department of Energy lacks a basis for consideration of site suitability.

The public cannot have confidence in any recommendation that arises from such a dramatically flawed process. We respectfully urge you to oppose the Yucca Mountain Project in Congress.

## Petition Opposing the DOE's Preliminary Recommendation of a Yucca Mountain Nuclear Waste Dump

Comments on the Dept. of Energy's Preliminary Recommendation of Yucca Mountain Nuclear Waste Repository.

Yucca Mountain is Western Shoshone Indian land, as affirmed by the Treaty of Ruby Valley entered into by the U.S. Government in 1863. The Western Shoshone National Council adamantly opposes dumping nuclear waste at Yucca Mountain.

How can the Secretary of Energy be preparing to recommend Yucca Mountain for a high-level nuclear waste dump when thousands of public comments on the Draft Environmental Impact Statement have not been addressed and key documents have not been finalized? In the absence of a Final Environmental Impact Statement, a Nuclear Regulatory Commission review, and a detailed proposal for transporting nuclear waste to Nevada, the Department of Energy lacks a basis for consideration of site suitability.

The public cannot have confidence in any recommendation that arises from such a dramatically flawed process. We respectfully urge you to oppose the Yucca Mountain Project in Congress.

## Petition Opposing the DOE's Preliminary Recommendation of a Yucca Mountain Nuclear Waste Dump

Comments on the Dept. of Energy's Preliminary Recommendation of Yucca Mountain Nuclear Waste Repository.

Yucca Mountain is Western Shoshone Indian land, as affirmed by the Treaty of Ruby Valley entered into by the U.S. Government in 1863. The Western Shoshone National Council adamantly opposes dumping nuclear waste at Yucca Mountain.

How can the Secretary of Energy be preparing to recommend Yucca Mountain for a high-level nuclear waste dump when thousands of public comments on the Draft Environmental Impact Statement have not been addressed and key documents have not been finalized? In the absence of a Final Environmental Impact Statement, a Nuclear Regulatory Commission review, and a detailed proposal for transporting nuclear waste to Nevada, the Department of Energy lacks a basis for consideration of site suitability.

The public cannot have confidence in any recommendation that arises from such a dramatically flawed process. We respectfully urge you to oppose the Yucca Mountain Project in Congress.
